

RELEASE NOTES

Clinical Decision Support Platform
1.2.1
September 14, 2026

Supported Medical Devices

ADNEX2

- [ADNEX2 electronic Instructions for Use \(eIFU\)](#)

IETA

- [IETA electronic Instruction for Use \(eIFU\)](#)

EPC

- [EPC electronic Instruction for Use \(eIFU\)](#)

New Features / Enhancements

No new features or enhancements are introduced in this patch release.

Improvements / Bug fixes

PWA compatibility with the Google Search app: Resolved an issue where the Progressive Web App was blocked inside the in-app browser of the Google Search app. The browser compatibility check was too restrictive and has been corrected, so the PWA now loads and operates as expected in that environment.

Known issues

No known issue identified

Security Updates

Infrastructure security updates: access control between the platform components has been tightened and encryption is now enforced on the connection between the backend and the database.
